SUMMARY

Technical Product Manager with experience owning product roadmaps and leading cross-functional teams through the full SDLC — from PRD authoring and feature design through CI/CD coordination, UAT/production validation, and release management. Skilled in Agile/Scrum delivery, sprint planning, backlog grooming, competitive analysis, user experience reviews, and data-driven decision-making across AWS and Azure. PMP, AWS AI Practitioner, and FinOps Practitioner / FOCUS Analyst certified.

EXPERIENCE

Technical Project Manager - Cloud FinOps

Finomics

Sept. 2025 – Present

Hybrid – Chandler, AZ

- Own the product roadmap for AI/ML-powered FinOps products including cost recommendation engines, anomaly detection, forecasting models, and an AI chatbot, authoring PRDs and translating business needs into detailed user stories with clear acceptance criteria and Definition of Done.
- Lead sprint planning, backlog grooming, and retrospectives for 40+ engineers and QA across four concurrent teams, tracking story points and team velocity to optimize delivery cadence.
- Coordinate release management and CI/CD pipeline schedules with engineering, shipping 4+ production releases per quarter with smooth deployments from UAT through production environments and zero-downtime releases.
- Conduct competitive analysis and market research to inform feature prioritization and go-to-market strategy, while contributing to feature design and user experience reviews to ensure deliverables meet usability standards.
- Influence cloud infrastructure spend decisions and resource allocation across FinOps product workstreams, aligning engineering capacity with product priorities to maximize delivery ROI.
- Execute rigorous UAT/production validation testing for AI/ML features including invoice parsing, contract upload workflows, and predictive forecasting, resulting in a 20% improvement in data integrity and more predictable deployment cycles.
- Conduct technical product demonstrations for multiple resellers, effectively communicating product value to drive partner engagement and market readiness.

Product Analyst

Immigration, Refugees and Citizenship Canada (IRCC) - Gov. of Canada

May. 2024 – Aug. 2025

Remote – Ottawa, CA

- Led a cross-functional team through the full SDLC to automate weekly Netezza server refreshes, defining project scope and timelines using Kanban boards, and facilitating backlog grooming and sprint reviews to ensure team alignment and compliance requirements.
- Managed risk and quality control with automated error-handling and standardized load-count tracking, reducing downtime by 25% and improving data integrity by 20%, while developing Gantt charts and process reports to communicate project status to stakeholders.

Product Analyst

Amay Exim Inc.

May. 2021 – Aug. 2024

Remote – Toronto, CA

- Led end-to-end SDLC delivery of a machine learning project for wood purchasing optimization, gathering stakeholder requirements and defining KPIs and success metrics to guide data-driven decision-making.
- Managed backlog prioritization and sprint cadence using a hybrid Agile-Waterfall methodology, coordinating data scientists, analysts, sourcing, and sales teams while building reporting dashboards to track product insights across leadership.
- Performed market analysis across multiple international markets, identifying pricing trends and demand patterns that shaped product recommendations, reduced procurement costs, and improved operational efficiency.

CERTIFICATIONS / TECHNICAL SKILLS

Certifications: AWS Certified AI Practitioner | FinOps Practitioner/FOCUS Analyst

Project Management Tools: Microsoft Project | Jira | Azure DevOps | Excel | Power BI | SmartSheets | Confluence

Methodologies: Agile | Scrum | Kanban | Hybrid (Agile-Waterfall) | SDLC | CI/CD | Release Management

Project Skills: Sprint Planning | Backlog Grooming | Feature Prioritization | Scope Management | Risk Management | Stakeholder Management | Resource Planning | Competitive Analysis

AWS Services: Amazon S3 | Amazon EC2 | Amazon Comprehend | Amazon Q Business | Amazon IAM | Amazon QuickSight

Databases: MySQL | Oracle | NoSQL

EDUCATION

Toronto Metropolitan University

BSc (Hons) – Computer Science | Minor – Information Technology Management

2018 – 2025

Toronto, CA

- Big Data Systems, Data Science, Data Mining, DBMS, Computer Networks, Algorithms, Statistics, Linear Algebra
